

Our environmental policy. AMPERFIED GmbH.

Vision:

As part of the Heidelberg Group, AMPERFIED GmbH is a role model for sustainability within its industry. For us, sustainability means achieving long-term harmony between the environment, the economy and social responsibility.

Compliance with legislation:

AMPERFIED GmbH meets all its mandatory obligations, for example in relation to environmental laws and regulations.

Communication:

- We raise awareness among our employees and partners about the importance of acting sustainably.
- We use our communications to act as an opinion former in our industry and in relation to all our business partners.

Sites:

- We are gradually reducing emissions that cause harm to the climate and to human health.
- By means of a continuous improvement process (CIP) at our sites, we ensure that we reduce our environmental impact and avoid health risks.
- We give preference to suppliers and partners whose products and services provide environmental and social added value.
- We ensure that our production processes make efficient use of resources, materials and energy.

Products and services:

- We develop products that reduce our environmental footprint in response to the challenges facing the environment and the climate.
- We create environmentally friendly innovations that are safe to use across all the phases of the product life cycle, in other words manufacturing, operation and disposal/recycling.
- Wherever possible, we make our products more energy-efficient.
- We are constantly expanding our portfolio with the aim of helping our customers to ensure that their charging processes and their energy supply are efficient and environmentally friendly. We put the emphasis on offering our customers carbon-neutral products and services.

Transport and logistics:

We continuously improve our transport and logistics processes by using environmentally friendly packaging and transport methods and routes.

We are pleased to take responsibility for this.
